

SecureG is a digital trust and cybersecurity company securing the next generation of devices, hardware, software, AI, and connected infrastructure. Operating at the convergence of Agentic AI Security, Supply Chain Traceability, and Digital Identity, SecureG provides the identity, provenance, and policy controls enterprises need to trust AI agents, applications, devices, software, and critical infrastructure.

WHAT WE DO

- ▶ **MCP Gateway (Agentic AI):** Authentication, authorization, encryption, provenance, and governance for AI agents, verifying who an agent is, what it can access, what it did, and whether it's policy-compliant.
- ▶ **Supply Chain Traceability:** Cryptographic provenance for hardware, software, and digital assets across their lifecycle, validating authenticity and chain of custody.
- ▶ **Digital Trust Infrastructure:** Root of Trust, Public Key Infrastructure (PKI) and quantum-ready identity services; the cryptographic foundation underlying the full portfolio.

VALIDATION

- ▶ \$1.25M AFWERX SBIR award for advanced cybersecurity innovation
- ▶ \$6.5M NTIA NOFO 2 award for supply chain security & digital trust infrastructure
- ▶ Accepted into NVIDIA Inception Program
- ▶ Strategic engagements: AWS, HPE, Fujitsu/1Finity, G+D Mobile Security, Tenable, CTIA, SunSpec Alliance
- ▶ Commercial deployments across telecom, supply chain security, critical infrastructure, and AI ecosystems

GO-TO-MARKET

- ▶ MCP Gateway launched production-ready
- ▶ Supply Chain Traceability initiatives advancing with strategic industry participants and OEM ecosystems
- ▶ Focused on securing 2-3 anchor customers that can serve as market references and accelerate adoption.
- ▶ AWS Partnership
- ▶ Expanding channel and strategic partnerships
- ▶ \$4.99M in 2025 revenue

WHY INVEST NOW

SecureG is transitioning from an innovation-focused organization into a commercialization-driven growth company. Years of R&D, IP development, and market validation via government programs, partnerships, and deployments have produced production-ready platforms and a focused go-to-market strategy. The company is now securing anchor customers for MCP Gateway and Supply Chain Traceability while expanding cloud, AI, OEM, telecom, and critical infrastructure partnerships, positioning SecureG to convert years of R&D into recurring commercial revenue and long-term enterprise value.
